CDS³² SAT

News/Talk/Sports/Music Satellite Automation that Sounds Local!

Value

19" Rackmount Computer - Intel Pentium-4 2.66GHz Processor - Intel Motherboard with 512MB DDR & Extreme Graphics - 120GB Mirrored Storage - Microsoft Windows XP PRO DVD+RW CD Drive - Intel PRO 100 LAN - Microsoft Optical Mouse - 17" LCD Flatscreen Audio Science ASI-6012 Premium audio adapter - Broadcast Tools 8x2 Switcher

Features & Benefits

• Simultaneous play and record, including background recording of network spots, news or programs. • Powerful scripts provide for more than just the standard satellite features found in most systems. • CDS³² allows you to define watch windows for each spot-set so you'll never miss another mandatory or optional break again. • The On-Demand deck inserts liners, legal IDs, calls and jingles for a live, local sound. • Intelligent buffered liners will play correctly even if a spot-set runs long. • The system clock will automatically synchronize with network closures to provide for perfect timing and joins. • Pause and resume automation to control the audio switcher and go live unexpectedly for late breaking news or for airing remote broadcasts and ball games. • Share audio with others locally or anywhere in the world via the Internet. • Play and record in virtually any format including PCM, MP2, MP3. • Control CDS³² from anywhere via phone or Internet. • 24/7 Product Support and investment protection updates available from the company made famous for fast and friendly service. Pristine Systems.
